

PETER L.S. TREVOR

(250) 220 1613 / ptrevor@trisen.com

PROFILE

A development expert looking to extend best-practice in software solutions. Well-experienced and technically excellent, with proven communication and interpersonal skills, a team player/leader who also has the capacity to work on own initiative. Solutions orientated, performing well under pressure, achieving deadlines and working within budgets.

Recently returned from UK and now permanently resident in Canada.

EXPERIENCE SUMMARY

Languages:	MS C#.NET ... 3 years MS Visual Basic "classic" ... 8 years SQL ... 8 years ASP "classic" ... 1 year
SQL Databases:	MS SQL Server ... 7 years Oracle ... 2 years Borland InterBase ... 3 years MS Access ... 4 year
Other:	Synfusion Essential Studio ... 2 years MS Visual SourceSafe ... 4.5 years Merant PVCS ... 1.5 years Configuration Management processes ... 4 years
Legacy:	VAX/VMS, IBM mainframes, Unix, and Pick O/S COBOL, Cognos Powerhouse, DCL, and Pro-IV
Interpersonal:	Team Leadership ... 1.5 years Mentoring ... 1 year
Business Areas:	Financial (Merchant bank, Pensions, Retail bank) ... 9.5 years Automotive ... 3 years Construction ... 2 years Telecoms ... 2 years Other: ... 4.5 years

RECENT ACTIVITY (additional to employment)

Mar 09 – Present

Independent Consultant

- Mentoring of a former mainframe COBOL programmer in MS C#.NET and MS SQL Server (winform and ASP.NET).
- Support of various web sites.

Obtained Microsoft certifications (MCTS x2) in .NET technologies. Studying for further certification (additional MCTS and MCPD).

EMPLOYMENT HISTORY

- Jul 08 – Present **Independent Consultant/Developer** (part time)
- Clients: BITS
- Redeveloping retail application into MS C#.NET/MS SQL Server and extending functionality.
- Jul 04 – Dec 08 **Contract Developer**
OrangeGenie (UK)
- Clients: Global Asset Management
Isban/Abbey National
Coke-Cola Enterprises
In2Focus
Norwich Union
Countrywide Surveyors
- Liaised with client's development team to create and clarify pattern-based coding standards. Managed client's common .NET code framework.
 - Developed a real-time data monitoring program (a multithreaded C#.NET front-end that included drill-down analysis and used sockets to respond to Oracle database changes in real-time).
 - Developed a series of static data maintenance programs for use with a new third-party trade system solution. (C#.NET MDI interface skinned to match Office 2007.)
 - Rescued and completed project to develop a common account reconciliation application.
 - Created series of procedures (using MS Visual Basic 6 and screen scraping) to automate IBM mainframe legacy processes.
 - Automated (via code) replication of central MS SQL Server databases to multiple tablet PC based databases.
 - Built new functionality into Excel/VBA-based sales promotion planning tool.
 - Modularised and standardised series of complex DTS scripts used to create/upgrade/migrate customer databases.
- Jul 01 – Jan 05 **Independent Consultant/Developer** (part time)
- Clients: BITS
- Developed niche database application (sold retail).
 - Coordinated public beta.
 - Provided post-sales email support.
- Jun 01 – Jun 04 **Contract Developer**
RCT Consulting (UK)
- Clients: London Clearing House
Huntingdonshire District Council
Gnometrader

- Dedicated role performing Configuration Management tasks across multiple technology platforms, including process planning, software change tracking and auditing, repository administration, configuration documentation, software builds.
- Replaced legacy interface software between client's systems. Full software lifecycle including architecture, analysis, coding, testing, user training, security, and documentation.
- Mentored permanent staff in MS Visual Basic 6, general SQL and MS SQL Server 2000, and introduction to configuration management concepts.
- Replaced client's existing static website with full e-commerce solution (merging off-the-shelf packages and adding bespoke functionality).

Sep99 – May 01

**Programmer/Analyst
SEMA (UK)**

Clients: Cable & Wireless

- Co-ordinated and installed software releases at multiple sites globally.
- Lead team with 2 other staff in providing multinational patching support 24/7.
- Wrote automated script system to remotely patch application software.

PRIOR EMPLOYMENT HISTORY

May 97 – Sep 99	Contract Developer RCT Consulting (UK)	Clients: Credit Suisse First Boston Deutsche Morgan Grenfell - 24/7 on-call support of back-end. - Y2K project. - Developed financial reports.
Mar 92 – May 97	Programmer/Analyst Rothschild Asset Management (UK and Guernsey)	- Performed DEC VAX to DEC Alpha conversion. - Design, implementation, and maintenance of source code repository tools. - Maintained Portfolio Valuation software.
Feb 89 – Nov 91	Systems Engineer EDS (UK, Germany, Switzerland, Italy, and Belgium)	Clients: GM Europe - Installed VAX-based warehouse application (including mass data migration from, and integration with, legacy IBM systems) in Italy and Switzerland. - Designed and developed front-end to VAX source code repository. - Developed and managed patches of spare parts application.
Oct 88 – Dec 88	Programmer Morgan Grenfell & Co Ltd (UK)	- Development tasks including Stock Exchange tape interfaces and fiche software.
Feb 87 – Sep 88	Programmer SGB plc (UK)	- Designed, developed, and maintained accounting functions. - Developed in-house programming standards.

EDUCATION

NESCOT - North East Surrey College of Technology (UK)

City and Guilds 417 Certificate in Application Programming

University of Calgary (Canada)

First year Computer Science and Psychology

Passed courses in: Computer Science, Mathematics, Philosophy, and Psychology

	MCTS – .NET Framework 2.0, Windows Applications MCTS – .NET Framework 2.0, Web Applications MCSD – Visual Studio 6.0
