PETER L.S. TREVOR
(250) 220 1613 / ptrevor@trisen.com

PROFILE

A development expert looking to extend best-practice in software solutions. Well-experienced and technically excellent, with proven communication and interpersonal skills, a team player/leader who also has the capacity to work on own initiative. Solutions orientated, performing well under pressure, achieving deadlines and working within budgets.

EXPERIENCE SUMMARY

Languages:
MS C#.NET (winform, server, plus some ASP.NET) … 7 years
MS Visual Basic "classic" … 8 years
SQL … 11.5 years
ASP "classic" ... 1 year

SQL Databases:
MS SQL Server … 10.5 years
Oracle … 2 years
Borland InterBase … 3 years
MS Access … 4 year

Other:
Syncfusion Essential Studio … 2 years
MS Team Foundation Server … 3.5 years
MS Visual SourceSafe … 4.5 years
Merant PVCS … 1.5 years
Configuration Management processes … 4 years

Legacy:
VAX/VMS, IBM mainframes, Unix, and Pick O/S
COBOL, Cognos Powerhouse, DCL, JCL, and Pro-IV

Personal:
Team Leadership … 1.5 years
Mentoring … 2 year

Business Areas:
Financial (Merchant bank, Pensions, Retail bank) … 9.5 years
ERP … 3.5 years
Automotive (Warehousing) … 3 years
Telecoms (Billing) ... 2 years
Construction (Sales) … 1.5 years
Other: … 5 years

EMPLOYMENT HISTORY

Nov 10 – todate   **Developer**
UNIT4 Business Software (Canada)

Clients: (many)

- Developed and delivered multiple functional enhancements for UNIT4's ERP suite (Agresso Business World) primarily using MS C#.NET and MS SQL Server. Areas include logistics, payroll, travel expenses, and external interfaces.
- Acted in QA role on major US project (radiation dosimeter ordering, billing, and reporting)
- Reviewed and advised on internal processes improvement.
- Assisted in recruitment and mentored new staff in UNIT4's code framework.

Jul 08 – todate   **Part time Consultant/Developer**
(independent) (UK/Canada)

Clients: BITS
                (private individuals)

- Redeveloping retail application into MS C#.NET / MS SQL Server and extending functionality.
- Mentoring of a former mainframe COBOL programmer in MS C#.NET and MS SQL Server (winform and ASP.NET).
- Support of various web sites.

Jul 04 – Dec 08   **Contract Developer**
OrangeGenie (UK)

Clients: Global Asset Management
                Isban/Abbey National
                Coke-Cola Enterprises
                In2Focus
                Norwich Union
                Countrywide Surveyors

- Liaised with client's development team to create and clarify pattern-based coding standards. Managed client's common .NET code framework.
- Developed a real-time data monitoring program (a multithreaded C#.NET front-end that included drill-down analysis and used sockets to respond to Oracle database changes in real-time).
- Developed a series of static data maintenance programs for use with a new third-party trade system solution. (C#.NET MDI interface skinned to match Office 2007.)
- Rescued and completed project to develop a common account reconciliation application.
- Created series of procedures (using MS Visual Basic 6 and screen scraping) to automate IBM mainframe legacy processes.
- Automated (via code) replication of central MS SQL Server databases to multiple tablet PC based databases.
- Built new functionality into Excel/VBA-based sales promotion planning tool.
- Modularised and standardised series of complex DTS scripts used to create/upgrade/migrate customer databases.

PRIOR EMPLOYMENT HISTORY

Jun 01 – Jan 05	**Part time Consultant/Developer (independent)** (UK)	Clients: BITS Gnometrader - Developed niche retail application, coordinated public beta, provided post-sales support. - Replaced existing static website with e-commerce solution (mix of packages and custom coding).
Jun 01 – Jun 04	**Contract Developer RCT Consulting** (UK)	Clients: London Clearing House Huntingdonshire District Council - SCM across multiple technology platforms. - Replaced legacy interface software (full SLC). - Mentoring.
Sep 99 – May 01	**Programmer/Analyst SEMA** (UK)	Clients: Cable & Wireless - Coordinated and installed software releases at multiple sites globally. - Lead team with 2 other staff in providing multinational patching support 24/7. - Wrote automated script system to remotely patch application software.
May 97 – Sep 99	**Contract Developer RCT Consulting** (UK)	Clients: Credit Suisse First Boston Deutsche Morgan Grenfell - Y2K project. - 24/7 on-call support of back-end processes. - Developed financial reports.
Mar 92 – May 97	**Programmer/Analyst Rothschild Asset Management** (UK and Guernsey)	- Performed DEC VAX to DEC Alpha conversion. - Design, implementation, and maintenance of source code repository tools. - Maintained Portfolio Valuation software.
Feb 89 – Nov 91	**Systems Engineer EDS** (UK, Germany, Switzerland, Italy, and Belgium)	Clients: GM Europe - Installed VAX-based warehouse application (including mass data migration and integration with legacy IBM systems) in Italy and Switzerland. - Designed and developed front-end to VAX source code repository. - Developed and managed application patches.
Oct 88 – Dec 88	**Programmer Morgan Grenfell & Co Ltd** (UK)	- Development tasks including Stock Exchange tape interfaces and fiche software.
Feb 87 – Sep 88	**Programmer SGB plc** (UK)	- Developed, and maintained accounting programs. - Created programming standards. - Member of "Positive Attitude" committee.

EDUCATION

NESCOT - North East Surrey College of Technology (UK)
City and Guilds 417 Certificate in Application Programming

University of Calgary (Canada)
Passed first year courses in: Computer Science, Mathematics, Philosophy, and Psychology
